- **Project Overview:**
  - Tradeasy represents a revolutionary step forward in the world of export business management, offering a comprehensive and intuitive solution built on the Flutter framework. With its user-friendly interface and powerful features, Tradeasy empowers agents and wholesalers to navigate the complexities of the export industry with ease.

- **User Authentication:**
  - **Login Page:** The login page serves as the gateway to Tradeasy, providing agents and wholesalers with secure access to their respective accounts.
    - User-Friendly Interface
    - Credential Verification
    - Registration Functionality
    - Password Security

- **Agent Side:**
  - Upon logging in as an agent, the following options are available:
    - **Wholesaler's Detail:** Comprehensive information about registered wholesalers.
    - **Bid Detail:** Details of bids which made by wholesalers. So agent can easily get right value of product.
    - **Add Wholesaler:** Ability to add new wholesalers by entering Email and generating secure passwords.
    - **Add Data:** add export product data that wholesalers can access.

- **Wholesaler Side:**
  - Upon logging in as a wholesaler, the following options are available:
    - Data Page: Display of all product-related data added by agents. Also Option to express interest in specific products.
    - Interested Data: Information about products of interest to the wholesaler. Also, Ability to place bids on products. Also ease to delete items from the interest list.

- Profile Page: view and edit profile information.
- Change Password: Allows for the modification of the password for ease of access of wholesaler.
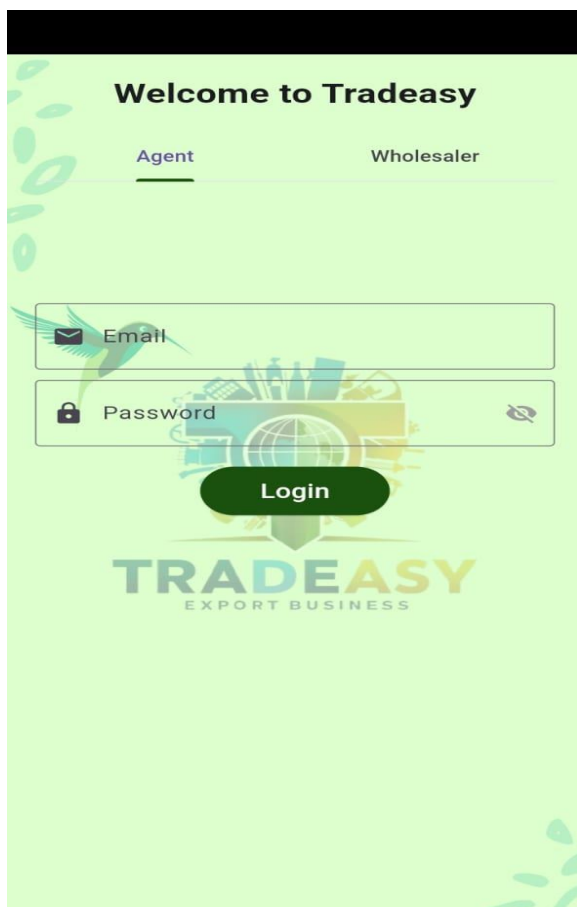

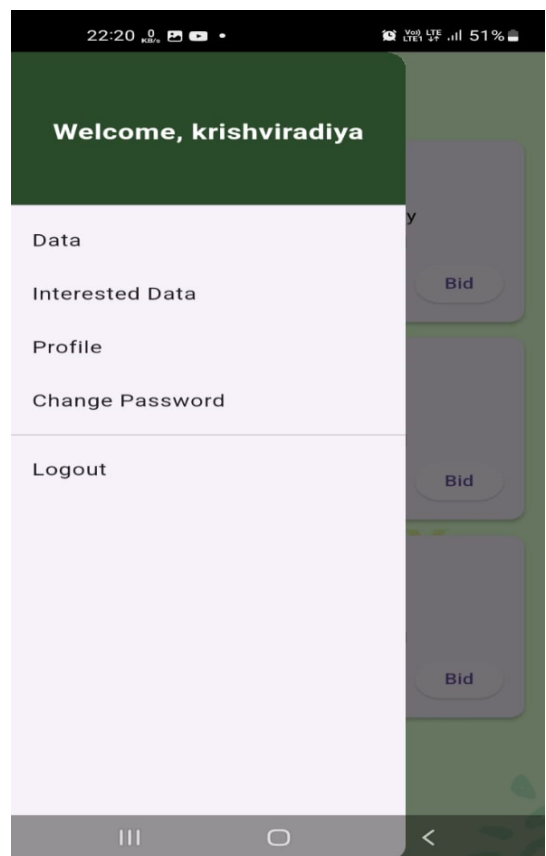

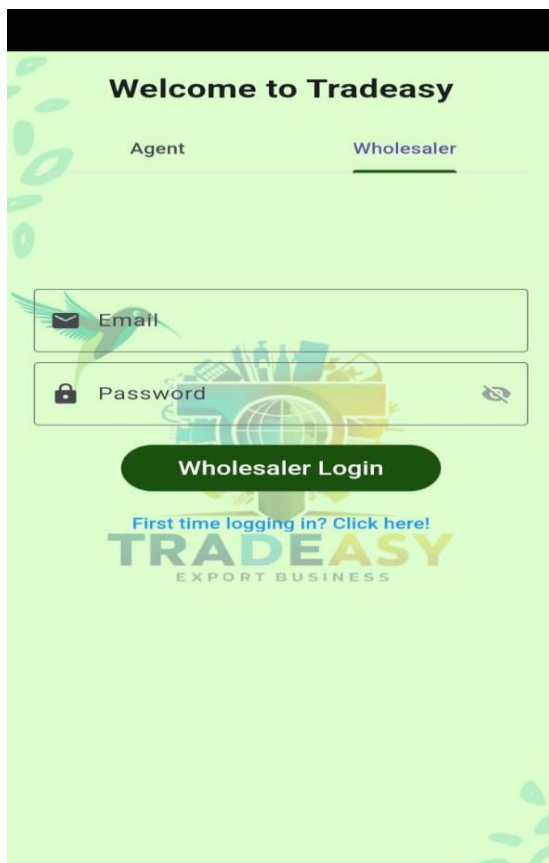

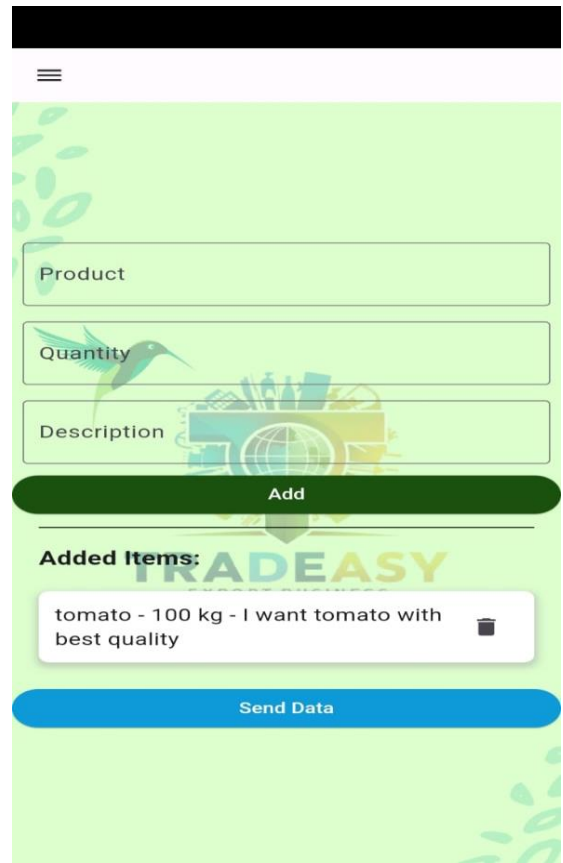

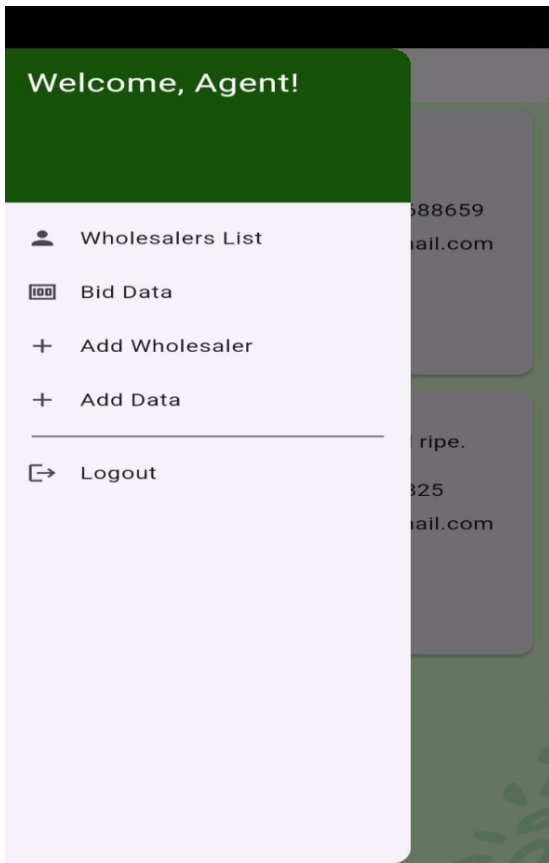

- **Technology:**
  - Flutter Framework
  - Firebase database
  - Code editor:
    - Vs Code

- **Development Process:**
  - Agile methodology adopted for iterative development.
  - Regular communication with stack person.

- **Screenshots:**
